

## Minutes for the team meeting – Talio

Location: DW, PC room 1

Date: 4.apr.2023

Time: 15:35

Attendees: **Chair:** Bosch Teun, **Minute Taker:** Iordan Rares, Bavec Matej, Grisel Edsard, Herbiet Dorian, Tabacaru Alex

### Opening

No notes.

### Check in.

Alex – has difficulties with testing the client.

Dorian – is refactoring the util classes.

### Announcements

Pitch and Self Reflection feedback has been released.

TA – Grading rubrics will be divided among TAs.

### Product Pitch

TA – Going through backlog and showing everything in the product pitch is recommended. Think of edge cases and showcase them. App must be very visible in the product pitch.

**We should start on the product pitch on Thursday (6.apr.2023).**

### Testing

#### Testing the client

Dorian is working on the utils (he's simplifying the utils classes so they can be mocked).

- Refactored board utils and list utils so far.

Alex

- local services that call the utils.

TA suggests:

- balance test grade vs risking breaking stuff.
- Focus on the tasks.
- Start filling in the gaps from top to bottom from the backlog.

### Password-protection

- Evaluate situation on Friday.
- Lowest priority.

## Deadlines

- HUE
- Product Pitch
- Code

## Feedback

Everyone: meeting went well.

## Questions

None
